Platform lifts for commercial and public buildings

Lifts for prime mobility.

Inspired in design, comfort and simplicity. A platform lift that combines versatility in form and function with ease of installation and use. One that complements and blends into any environment, internally or externally, with just the right aesthetic touch. Runs year in and year out, without incident. Simply, a lift that takes mobility to new levels and adds to the value of your building.

Your vision is our purpose. Since 1995, Aritco Prime lifts has been developed with insight on market tastes and close collaboration with architects, builders, installers, access consultants and partners. To this, we add technical know-how and dedicated professional support for an exceptional construction as well as reliable delivery and lifelong durability.

“Aritco Prime lifts meet all European standards and regulations as well as high individual expectations on aesthetics. The perfect solution to help you rise above the crowd.”

Tommy Löwbäck, CEO

A prime choice

Whether you are designing, building or renovating, we offer a range of extraordinary possibilities. Consider all the ways you might move up market. Consider a Prime choice.

Assured with the highest standards of quality and safety, Aritco Prime lifts are in operation, problem free, all around the world. They are suited to a multiple of environments, with a myriad of designs.

Daycare centers, schools and universities

Durable enough to withstand even the most boisterous children, our platform lifts offer practical access solutions for educational institutions at every level. Our design options ensure maximum choice and flexibility, and can be accommodated to new buildings as well as extensions.

Offices

In addition to advantages in mobility, an elevation in design can be just the right investment for your office. Simple and economical, Prime lifts also add a sense of style and efficiency. So you get the most out of your business.

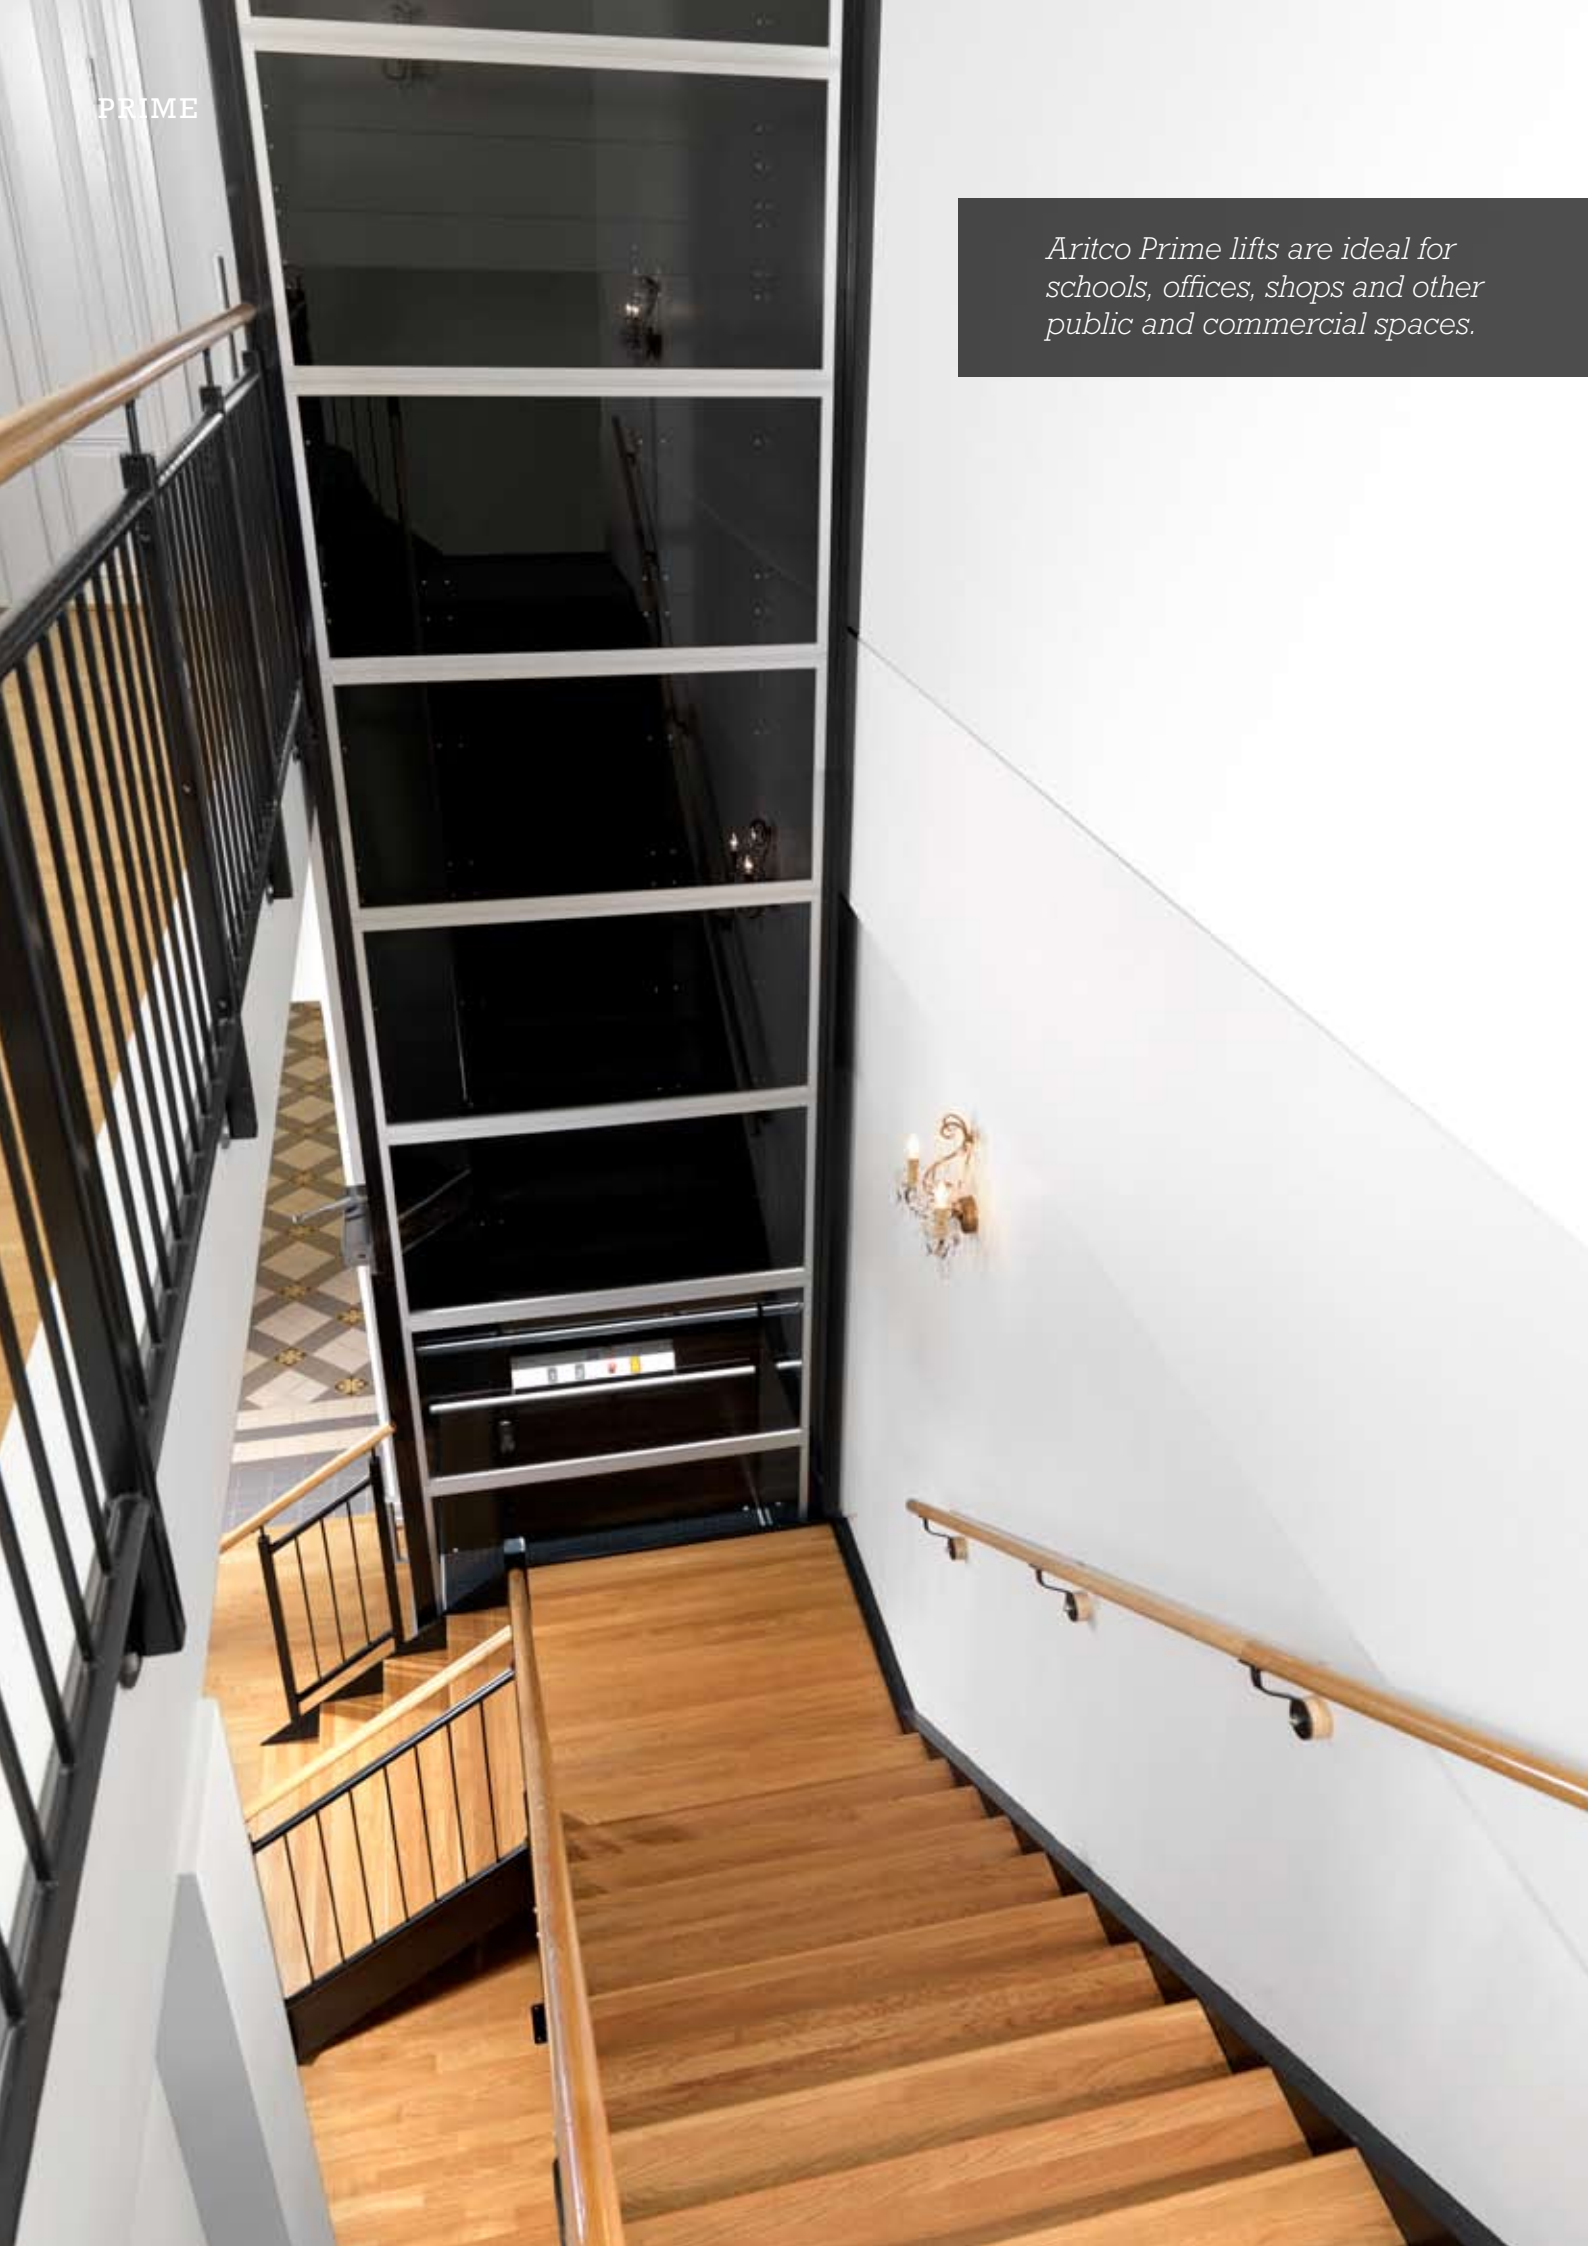

Stores and shopping centers

Convenience is a must to truly lift the shopping experience. Our platform lifts give shoppers the freedom to move about easily and follow their every impulse – even if they are pushing a shopping cart or baby stroller, using a wheelchair or loaded with lots of bags.

PRIME

Aritco Prime lifts are ideal for schools, offices, shops and other public and commercial spaces.

At your service

Prime lifts are offered in standardised packages or tailored to your specifications with a range of sizes, configurations, styles and functional options. They can be readily installed in existing or new buildings, internally or externally.

Manufactured in modules, the lifts require minimal space or construction work. Installation takes a few days, and impact on the building during installation is low. There's no machine room. The necessary machinery and the electrical system are housed inside a robust, self-supporting shaft enclosure.

In use, movement between floors is safe and easy. The operation console houses light, large tactile push buttons with emergency stop and alarm functions. All edges are guarded by sensors, and in the case of an emergency, the lift can be lowered by a battery-driven system to the closest floor.

Contact us for a more detailed consultation on how our lifts would best fit your building project. Our distributors worldwide can be found at www.aritco.com

Premium advantage with Aritco Prime lifts

- Flexible in size of platform and structural design
- High quality lift with a robust, self-supporting shaft
- Only 50 mm pit required for level entry, no pit with ramp
- Low overall cost compared to conventional lifts
- All machinery is housed inside the shaft enclosure

PRIME

PRIMECL7000

PRIMECLASSIC

PRIME CLASSIC is the most popular platform lift within Prime, fulfilling basic mobility needs in essential style and with a number of different technical options. PRIME CLASSIC comes in two models. PRIME CLASSIC 2000 has no walls and lifts up to 3 meters so you can get from one level to another in a cost effective way. PRIME CLASSIC 7000 includes walls, similar to a conventional lift, and travels up to 13 meters.

PRIMECUSTOM

PRIME CUSTOM is designed to fit into any environment, suit any project. With a variety of options, the lift can be customized according to your needs and tastes. Your choices include glass walls, a lift in any colour. PRIME CUSTOM also comes in a range of sizes.

PRIME C 7000

PRIMEXTR7000

PRIMEEXTERIOR

PRIME EXTERIOR has been developed for outdoor installations, anywhere from the cool Nordic countries to sunny Saudi Arabia. It is a good solution when space is limited inside and you need an alternative to stairs. PRIME EXTERIOR comes in two different models. PRIME EXTERIOR 2000 lifts up to 3 meters and PRIME EXTERIOR 7000 lifts up to 13 meters.

Just as attractive and functional, platform lifts are more affordable than conventional lifts. Construction is simpler since only the floor moves up and down. There is no need for a pit or a machine room.

Moving people. Elevating ideas. Since 1995, Aritco Lift AB has been dedicated to inspired mobility. Everything we do, from development and production to delivery and support is as simple as that.

We deliver platform and home lifts that bring exceptional value in design, comfort and simplicity. Versatile in style, fit to any environment. Quality and safety that is assured in construction and operation. An experience, in installation and use, underlined by ease. Our lifts are found in commercial and public spaces as well as homes all around the world.

With a long tradition of collaboration with architects, contractors and property owners, we understand that success comes with market insight. To that, we add experience and know-how as well as a steadfast professional commitment.
