# CONTROL YOUR LIFT EASILY

Aritco SmartLift App
Datasheet 2023

With the Aritco SmartLift App we want to create a great user experience when the lift owner wants to configure their Aritco lift.

With a user friendly mobile app it's easy to control the features of the lift, and you will always have access to information and status of your lift.

The biggest advantage with the app is giving the lift owner direct control with the ability to change both appearance and functionality to their liking.

Our intention is to continously develop the Aritco SmartLift App according to feedback we get from the market to make sure it stays attractive and adds value to the owner of an Aritco lift.

Aritco SmartLift App

Key functionality	The Aritco home lifts are SmartLift enabled which means you get live status information in the app and the maintenance provider can get access to a Fleet management system for remote monitoring and support of the lift.

Lift Status	**Lift status OK!** The Lift is OK.	**Check the lift!!** The lift has warnings and user should check the error message and contact a maintenance provider depending on the type of problem.	**Check the lift!!** The lift has active alarms and the user should check the message and contact a maintenance proveder to fix the problem.
Maintenance indicator	Indicates when it is time for the next service.		
Child lock	Lock the lift so it cannot be operated from the platform. This feature can be activated instantly and you can create a weekly recurring schedule.		
Floor lock	Lock a floor so you cannot travel to this floor. This feature can be activated instantly and you can create a weekly recurring schedule.		
DesignLight	The user can configure 3 different modes for the lights. **Always on,** where the lights in the lift are always on. **Fade**, where the lights fade to the user configured level when the lift is not in use. **Energy saving,** which turn off all lights when the lift is not in use. If the lift is equipped with the color LED you can set the color of the shaft lights via the app.		
Speed	For lifts with the high speed option the user can set the desired travel speed. *		
App download	Can be downloaded from: **Apple App Store, Google Play and Huawei AppGallery.**		

* Only available outside CE and UKCA markets.
