

REMOTE MONITORING & CONTROL

Aritco SmartFleet Datasheet 2025

Aritco lifts¹ are seamlessly connected to the Smartfleet platform allowing for 24/7 monitoring. With access to real time data from the lift you are immediately informed if there is a problem. With instant alarm notifications, remote monitoring and configuration in Aritco SmartFleet, troubleshooting can be done more efficiently.

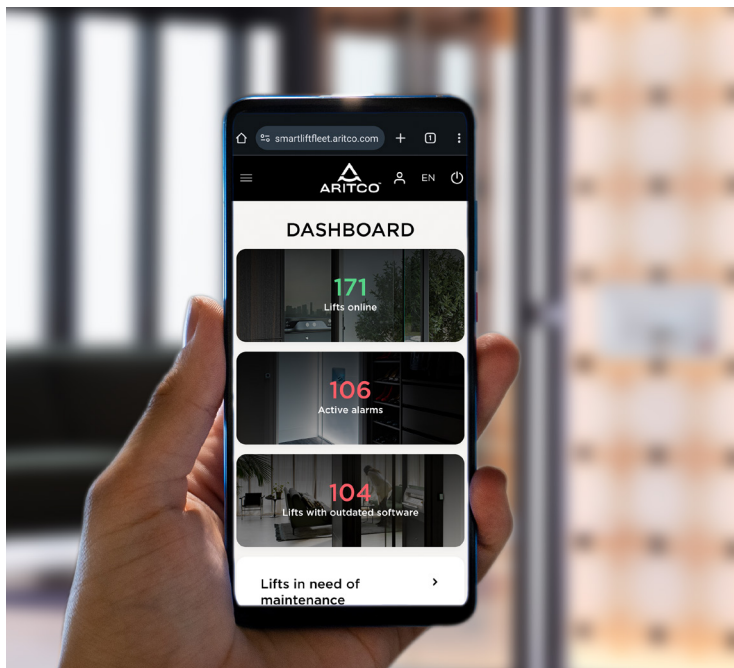

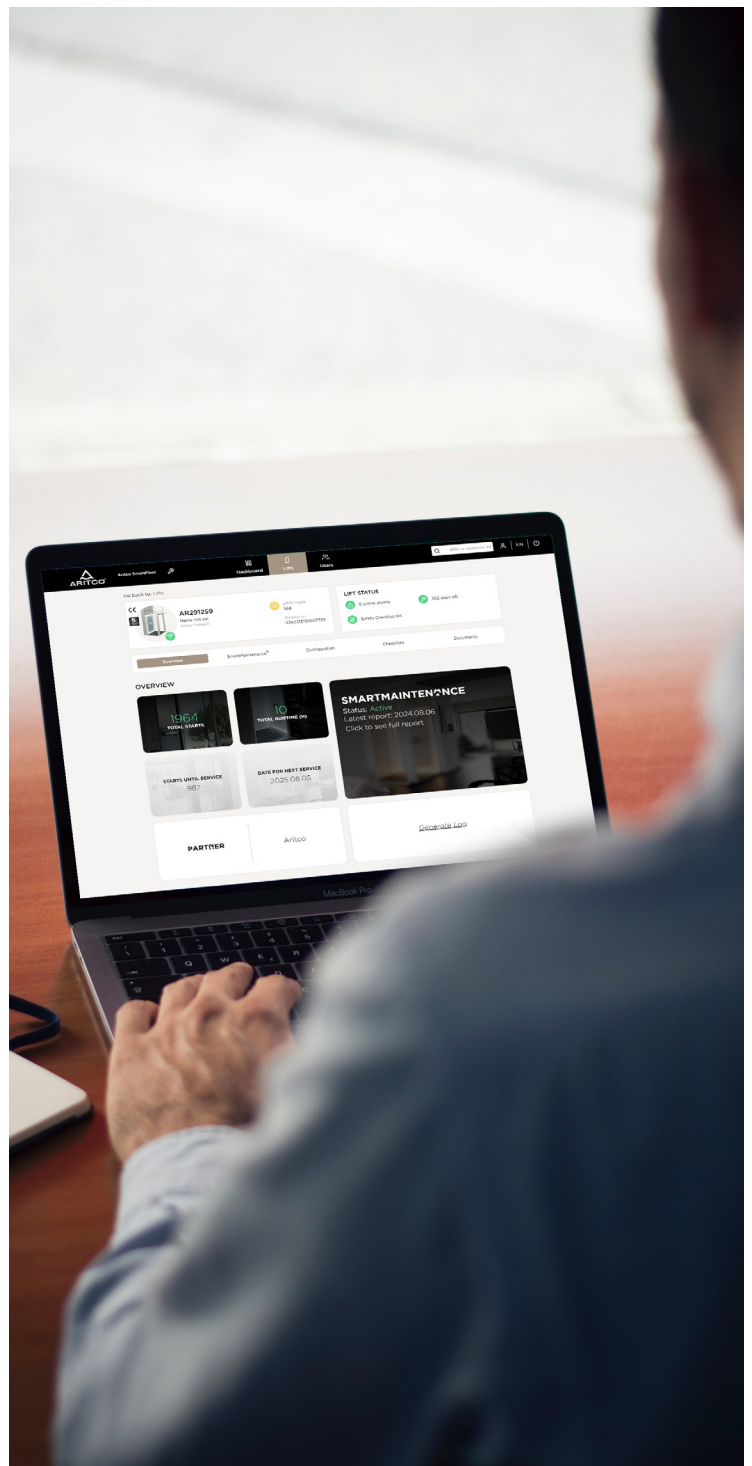

Aritco SmartFleet reduce the risk of breakdowns by tracking usage patterns and lift status over time. The platform increases safety, durability and accessibility of the lift, leading to higher customer satisfaction. Improved efficiency in maintenance planning, troubleshooting and support activities can cut workload for maintenance companies.

Key functionality

- Remote monitoring
- Alarm notification
- Status and usage reporting
- Live lift status
- Configuration of parameters
- Remote update of software²

¹ Not applicable for Aritco 9000 and Aritco PublicLift Cabin

² Only applicable for Aritco HomeLift

Comprehensive overview

The SmartFleet dashboard gives a snapshot status of all lifts making it easier to manage and monitor them. Remote access to detailed information on lift status, configuration and alarms provide a better understanding of each lifts performance and history.

Remote Monitoring

Monitor lift operations from any location and reduce need for on-site inspections. Access current operational status, helping to quickly identify and address any issues, and ensuring smooth operation. Alarm notifications provide immediate alerts for malfunctions or irregularities, enabling prompt attention to minimize downtime.

Reporting

Status and usage reports tracking lift performance and usage patterns over time. This allows customization of maintenance schedules to meet the specific usage conditions of each lift. This optimizes both lift performance and maintenance efficiency.

User Experience

PC, tablet or smartphone, Aritco SmartFleet is designed to work both a computer in the office and on mobile devices when on the move to be available when and where it's needed.

Access

The Regional Sales Manager at Aritco will give you access to the application on request. The access is personal, but you can request several accounts if several persons at your company needs to have access to the application. You access the application via smartliftfleet.aritco.com You will find more information and user guidelines on Aritco Cloud and Aritco TechPortal (search word: SmartLift). If you need further support contact the Aritco Regional Sales Manager.
